I was interviewed the other day by Angel of the Blue Mtn Eagle. I didn't realize Triangle's lawyer had such a strong statement about not being the RP. Interesting.

Also, Marty was busy again looking for other sources. He did GPR and EC along the east side of the highway, found some tanks from the 60s at the 2nd Hand Store, unearthed them, found that they had been decommissioned in the 80s by filling with soil, and thinks they are a possible source.

I'm usually a very patient person, but this is starting to get on my nerves. We may well just begin a more aggressive GW treatment system here soon. I'll be putting some more thought into this and push the RP to get us a status report and discuss expectations with them soon.

BTW – we just sent them a demand letter for \$100,000 or so (May and June). Another 150K or so is coming from us for July.
